

## **Prefatory Note**

The attached document represents the most complete and accurate version available based on original copies culled from the files of the FOMC Secretariat at the Board of Governors of the Federal Reserve System. This electronic document was created through a comprehensive digitization process which included identifying the best-preserved paper copies, scanning those copies,<sup>1</sup> and then making the scanned versions text-searchable.<sup>2</sup> Though a stringent quality assurance process was employed, some imperfections may remain.

Please note that this document may contain occasional gaps in the text. These gaps are the result of a redaction process that removed information obtained on a confidential basis. All redacted passages are exempt from disclosure under applicable provisions of the Freedom of Information Act.

---

<sup>1</sup> In some cases, original copies needed to be photocopied before being scanned into electronic format. All scanned images were deskewed (to remove the effects of printer- and scanner-introduced tilting) and lightly cleaned (to remove dark spots caused by staple holes, hole punches, and other blemishes caused after initial printing).

<sup>2</sup> A two-step process was used. An advanced optimal character recognition computer program (OCR) first created electronic text from the document image. Where the OCR results were inconclusive, staff checked and corrected the text as necessary. Please note that the numbers and text in charts and tables were not reliably recognized by the OCR process and were not checked or corrected by staff.

# MONETARY AGGREGATES AND MONEY MARKET CONDITIONS

---

Prepared for the Federal Open Market Committee

By the staff Board of Governors of the Federal Reserve System

August 11, 1978

MONETARY AGGREGATES AND  
MONEY MARKET CONDITIONS

Recent developments

(1) M-1 increased at a 5.1 per cent annual rate in July and appears to be expanding over the July-August period at an annual rate of about 6 per cent, the mid-point of the Committee's range. M-2 expansion during July and August is projected to average almost 9 per cent at an annual rate, in the upper half of the Committee's range. Large-denomination time deposits included in M-2 have increased sharply in recent weeks, while growth in small-denomination time deposits slowed and savings deposits declined somewhat. At nonbank thrift institutions, deposit inflows strengthened further in July. Although sales of the new money market certificates picked up in July at both banks and thrifts, only the latter appear to be gaining substantial net new money through the instrument.

Growth in Monetary Aggregates  
over July-August Period

	<u>Ranges</u>	<u>Latest Estimates</u>
M-1	4 to 8	6.0
M-2	6 to 10	8.9
Memo: Federal funds rate (per cent per annum)		<u>Avg. for statement week ending</u>
		July 19 7.94
		26 7.88
		Aug. 2 7.89
		9 7.83

(2) Since the July FOMC meeting Federal funds have traded within a  $7\frac{3}{4}$  to 8 per cent range, while projected growth in the monetary aggregates over the July-August period has also remained well within the Committee's ranges. Although the funds rate was slightly higher during the inter-meeting period than in preceding weeks, short- and long-term market interest rates declined by as much as 20 and 30 basis points since the July FOMC meeting. The fall in rates developed in response to a shift in expectations, apparently induced by recent moderate growth in the monetary aggregates, failure of the Federal funds rate to move even higher, and signs of slowing in economic expansion. The rally was encouraged by efforts of Treasury security dealers and other active trading accounts to cover short positions in coupon issues and to build up larger long positions in bills. In addition, demand for Treasury bills increased as a result of substantial foreign central bank investment of dollars obtained in currency exchange support operations. Most recently, a portion of the general rate decline has been reversed.

(3) Corporate bond offerings to the public have been relatively light in recent weeks, but issuance of municipal bonds has been exceptionally heavy, partly reflecting a spurt in advance refunding issues in advance of a September 1 change in Treasury regulations. The Treasury also raised about \$5 billion of new money during the inter-meeting period. In its quarterly refunding operation, the Treasury sold \$7.7 billion of new debt instruments--including \$700 million issued to foreign official accounts on a non-competitive

basis--to roll over \$4.4 billion of maturing debt. Aggressive bidding by investors and a sizable volume of private non-competitive tenders left the dealer community with only about 35 per cent of the total awards to the domestic public. Dealers have thus far distributed about two-thirds of their awards.

(4) The improved deposit flows to thrift institutions and reduction in market interest rates have reduced the pressure on mortgage rates. While mortgage indebtedness apparently has continued to expand at about the stronger second-quarter pace, average rates on new home loan commitments at S&L's have edged up only slightly in recent weeks. Moreover, fewer institutions have been reporting that lendable funds are in substantially short supply.

(5) Growth in commercial bank credit rebounded in July, reflecting a very strong advance in total loans and a substantial rise in total investments. Real estate and consumer loans continued to rise at relatively strong rates. Growth in business loans also picked up from June's reduced pace, but remained below that recorded on average over the first half of the year. To help finance bank credit expansion, banks issued sizable amounts of negotiable CD's and other large time deposits.

(6) The table on the next page shows percentage annual rates of changes in related monetary and financial flows over various time periods.

	1976 & 1977 Average	Past Twelve Months July '78 over July '77	Past Six Months July '78 over Jan. '78	Past Three Months July '78 over Apr. '78	Past Month July '78 over June '78
Nonborrowed reserves	2.5	5.6	4.3	5.4	8.5
Total reserves	3.2	8.3	8.8	13.6	15.3
Monetary Base	7.7	9.4	8.4	10.7	8.7
<u>Concepts of Money</u>					
M-1 (Currency plus demand deposits) <u>1/</u>	6.8	7.4	6.9	6.4	5.1
M-2 (M-1 plus time deposits at commercial banks other than large CD's)	10.4	8.1	7.8	8.1	8.4
M-3 (M-2 plus deposits at thrift institutions)	12.3	9.4	8.1	8.7	10.0
M-4 (M-2 plus CD's)	8.6	10.4	9.6	9.0	8.5
M-5 (M-3 plus CD's)	11.1	10.8	9.2	9.4	10.0
<u>Bank Credit</u>					
Loans and investments of all commercial banks <u>2/</u>					
Month-end basis	9.8	11.5	12.3	12.9	16.7
Monthly average	9.5	11.4	11.3	11.1	11.8
<u>Short-term Market Paper</u> (Monthly average change in billions)					
Large CD's	-0.4	2.1	1.9	1.3	0.7
Nonbank commercial paper	0.2	0.2	0.5	0.5	0.8

1/ Other than interbank and U.S. Government.

2/ Includes loans sold to affiliates and branches.

NOTE: All items are based on averages of daily figures, except for data on total loans and investments of commercial banks, commercial paper, and thrift institutions--which are derived from either end-of-month or Wednesday statement date figures. Growth rates for reserve measures in this and subsequent tables are adjusted to remove the effect of discontinuities from breaks in the series when reserve requirements are changed.

Prospective developments

(7) Tabulated below for Committee consideration are two alternative short-run specifications for the Federal funds rate and the monetary aggregates. (More detailed and longer-term data are contained in the tables on pp. 6 and 7.)

	<u>Alt. A</u>	<u>Alt. B</u>
Ranges for Aug.-Sept.		
M-1	5½ to 9½	5 to 9
M-2	7 to 11	6½ to 10½
Federal funds rate (inter-meeting period)	7¾ to 8	7¾ to 8½

(8) Alternative A contemplates continuation of a Federal funds rate around the mid-point of the existing 7¾ to 8 per cent range. Under the circumstances, M-1 growth over the August-September period is expected to accelerate into a 5½ to 9½ per cent, annual rate, range--bringing the level of M-1 by September a shade above that implied by the upper bound of the Committee's newly adopted longer-run range, as may be seen from chart 1 on the following page. M-1 growth in June and July may have been held down by an unusually rapid run-up in U.S. Government deposits, and such deposits are projected to decline in September. Moreover, transactions demands for cash are likely to be fairly strong in the third quarter as a whole, when nominal GNP is projected to rise at about an 11 per cent annual rate. The projected M-1 increase for August and September would lead to an expansion in the third quarter at about a 6½ per cent annual rate, and would imply a rise in velocity of 4½ per cent at an annual rate (see Appendix II).

(9) M-2 in the August-September period under alternative A is expected to grow in a 7 to 11 per cent annual rate range. The interest-bearing component of M-2 may expand at about a 10 per cent annual rate over the period. This represents a slight slowing from the July rate of growth, but is more rapid than in the first half of the year. With inflows of deposits subject to ceiling rates remaining sluggish, banks are expected to sell substantial amounts of large time deposits--both non-negotiable and negotiable--to finance continued relatively strong credit demands.

(10) Inflows of interest-bearing deposits to thrift institutions are projected to slow over the weeks ahead from the rapid July pace. The impact of the initial shifting of funds from outstanding financial assets to the 6-month money market certificate, which has been aggressively marketed by thrift institutions, may soon run its course. Even so, as with the interest-bearing component of M-2, thrift deposits are expected to grow somewhat more rapidly than in the first half of the year.

(11) Under alternative A, the recent upward readjustment of market rates, following the unexpectedly sharp decline of recent weeks, may continue, with rates returning closer to their mid-July levels. Basically, however, demands on credit markets are not expected to strengthen significantly over the period. Corporate bond offerings are likely to remain near their recent reduced pace, municipal volume should drop off, and Treasury credit demands are not expected to pick up until later in the fall. In short-term markets, the 3-month

Treasury bill rate is still quite low relative to the Federal funds rate--a spread of about one percentage point--and the bill rate should rise more than other short rates unless there is a substantial volume of foreign central bank purchases.

(12) If the funds rate were to move up to the mid-point of the  $7\frac{1}{2}$  to  $8\frac{1}{2}$  per cent alternative B range, the upward adjustment in market rates would likely be prompt and marked. The 3-month bill rate should move toward  $7\frac{1}{2}$  per cent, and pressures on the CD and commercial paper rates should generate a further rise in the prime loan rate. The rise of interest rates on Treasury coupon issues would probably reverse all of the recent decline in such yields, and perhaps go somewhat further. And corporate bond yields may also rise fairly substantially given the prevailing narrow rate spread between Treasury and corporate issues.

(13) Growth in M-1 and M-2 under alternative B may be in ranges of 5 to 9 and  $6\frac{1}{2}$  to  $10\frac{1}{2}$  per cent, respectively. It is expected that continued issuance of the 6-month money market certificate by banks and thrift institutions will tend to moderate adverse impacts of rising interest rates on inflows of small-denomination time and savings deposits; the beneficial effect is likely to be most marked at thrift institutions, if recent experience is any guide. Nevertheless, the rising marginal cost of time and savings deposits, if not an actual slowing of deposit inflows, is likely to exert additional upward pressure on primary mortgage interest rates.

(14) The staff still expects that interest rates between now and mid-1979 will have to rise beyond those contemplated under the short-run specifications for alternative B--given projections for GNP growth--if M-1 growth over the one-year QII '78 to QII '79 period is to be around the upper limit<sup>1/</sup> of the 4 to 6½ per cent range adopted for that aggregate. Federal funds rate projections through the second quarter of next year are shown in appendix I.

---

<sup>1/</sup> Abstracting from shifts out of demand deposits of savings accounts occasioned by the automatic transfer regulation which goes into effect on November 1.

Directive language

(15) Given below are suggested operational paragraphs for the directive. The language of alternative A is consistent with the specifications of alternative A discussed in the preceding section. Like the directive adopted at the last meeting, it places main emphasis on money market conditions and calls for operations directed at maintaining the weekly-average Federal funds rate within the range of 7-3/4 to 8 per cent.

(16) The language of alternative B is consistent with the specifications of the tightening alternative discussed in the preceding section; it calls for operations directed initially at attaining a weekly-average Federal funds rate slightly or somewhat above the current level. This formulation also provides variants that enable the Committee to place main emphasis either on money market conditions or on monetary aggregates.

In the short run, the Committee seeks to achieve bank reserve and money market conditions that are broadly consistent with the longer-run ranges for monetary aggregates cited above, while giving due regard to developing conditions in financial markets more generally. During the period until the next regular meeting, System open market operations shall be directed

Alternative A

at maintaining the weekly-average Federal funds rate within the range of 7-3/4 to 8 per cent. In deciding on the specific objective for the Federal funds rate the Manager shall be guided mainly by the relationship between the latest estimates of annual rates of growth in the ~~July-August~~ AUGUST-SEPTEMBER period of M-1 and M-2 and the following ranges of tolerance: ~~4-to-8~~ \_\_\_\_\_ TO \_\_\_\_\_ per cent for M-1 and ~~6-to-10~~ \_\_\_\_\_ TO \_\_\_\_\_ per cent for M-2. If, giving approximately equal weight to M-1 and M-2, their rates of growth appear to be close to or beyond the upper or lower limits of the indicated ranges, the objective for the funds rate shall be raised or lowered in an orderly fashion within its range.

If the rates of growth in the aggregates appear to be above the upper limit or below the lower limit of the indicated ranges at a time when the objective for the funds rate has already been moved to the corresponding limit of its range, the Manager is promptly to notify the Chairman who will then decide whether the situation calls for supplementary instructions from the Committee.

Alternative B

INITIALLY at ~~maintaining-the~~ ATTAINING A weekly-average Federal funds rate ~~within-the-range-of-7-3/4-to-8-per-cent~~ SLIGHTLY (OR SOMEWHAT) ABOVE THE CURRENT LEVEL. SUBSEQUENTLY, OPERATIONS SHALL BE DIRECTED AT MAINTAINING THE WEEKLY-AVERAGE FEDERAL FUNDS RATE WITHIN THE RANGE OF \_\_\_\_\_ TO \_\_\_\_\_ PER CENT. In deciding on

the specific objective for the Federal funds rate the Manager shall be guided mainly by the relationship between the latest estimates of annual rates of growth in the ~~July-August~~ AUGUST-SEPTEMBER period of M-1 and M-2 and the following ranges of tolerance: ~~4- $\epsilon$ -8~~ \_\_\_\_\_ TO \_\_\_\_\_ per cent for M-1 and ~~6- $\epsilon$ -10~~ \_\_\_\_\_ TO \_\_\_\_\_ per cent for M-2. If, giving approximately equal weight to M-1 and M-2, their rates of growth appear to be

Monetary aggregates emphasis

SIGNIFICANTLY ABOVE OR BELOW THE MIDPOINTS

Money market emphasis

close to or beyond the upper or lower limits

of the indicated ranges, the objective for the funds rate shall be raised or lowered in an orderly fashion within its range.

If the rates of growth in the aggregates appear to be above the upper limit or below the lower limit of the indicated ranges at a time when the objective for the funds rate has already been moved to the corresponding limit of its range, the Manager is promptly to notify the Chairman who will then decide whether the situation calls for supplementary instructions from the Committee.

NOTE: Government security dealer trading positions are on a commitment basis. Trading positions, which exclude Treasury securities financed by repurchase agreements maturing in 16 days or more, are indicators of dealer holdings available for sale over the near-term. Underwriting syndicate positions consist of issues still in syndicate, excluding trading positions. The basic reserve deficit is excess reserves less borrowing at Federal Reserve less net Federal funds purchases. Weekly data are daily averages for statement weeks, except for corporate and municipal issues in syndicate which are Friday figures.

\* Strictly confidential.

\*\* Monthly averages for excess reserves and borrowings are weighted averages of statement week figures.

NOTE: Weekly data for columns 1, 2, 3, 6, and 7 are statement week averages of daily data. Weekly data in column 4 are average rates set in the auctions of 6-month bills that will be issued on the Thursday following the end of the statement week. Data in column 5 are 1-day Wednesday quotes. For columns 8 through 11, the weekly date is the mid-point of the calendar week over which data are averaged. Columns 12 and 13 are 1-day quotes for Friday and Thursday, respectively, following the end of the statement week. Column 14 is an average of contract interest rates on commitments for conventional first mortgages with 80 per cent loan-to-value ratios made by a sample of insured savings and loan associations on the Friday following the end of the statement week. Column 15 gives FNMA auction data for Monday preceding the end of the statement week. Column 16 is a 1-day quote for Monday preceding the end of the statement week. The FNMA auction yield is the average yield in bi-weekly auction for short-term forward commitments for Government underwritten mortgages. GNMA yields are average net yields to investors on mortgage-backed securities for immediate delivery, assuming prepayment in 12 years on pools of 30-year FHA/VA mortgages carrying the coupon rate 50 basis points below the current FHA/VA ceiling.
