Prefatory Note

The attached document represents the most complete and accurate version available based on original copies culled from the files of the FOMC Secretariat at the Board of Governors of the Federal Reserve System. This electronic document was created through a comprehensive digitization process which included identifying the best-preserved paper copies, scanning those copies, ¹ and then making the scanned versions text-searchable. ² Though a stringent quality assurance process was employed, some imperfections may remain.

Please note that this document may contain occasional gaps in the text. These gaps are the result of a redaction process that removed information obtained on a confidential basis. All redacted passages are exempt from disclosure under applicable provisions of the Freedom of Information Act.

¹ In some cases, original copies needed to be photocopied before being scanned into electronic format. All scanned images were deskewed (to remove the effects of printer- and scanner-introduced tilting) and lightly cleaned (to remove dark spots caused by staple holes, hole punches, and other blemishes caused after initial printing).

² A two-step process was used. An advanced optimal character recognition computer program (OCR) first created electronic text from the document image. Where the OCR results were inconclusive, staff checked and corrected the text as necessary. Please note that the numbers and text in charts and tables were not reliably recognized by the OCR process and were not checked or corrected by staff.

SUPPLEMENT

CURRENT ECONOMIC AND FINANCIAL CONDITIONS

Prepared for the Federal Open Market Committee

Home sales

Housing demand increased sharply in June according to new data. Sales of new houses in June rose over 15 percent from May and were more than 50 percent above April's depressed rate. At this improved sales pace, builders had inventories of 7.8 months' supply--down from the record levels seen this spring. In addition, sales of existing houses rose 7 percent in June, the first increase after 8 months of decline.

House prices also showed some upward movement. The average selling price of a new house in June was \$77,900, 5 percent above a year earlier. The average selling price of existing houses, at \$74,100, in June was 12 percent above June, 1979.

Consumer installment credit

Consumer installment credit outstanding contracted at a record annual rate of 13-1/2 percent in June, slightly exceeding the 13-1/4 percent decline in May. New credit extensions again dropped by more than credit liquidations. The declines in credit outstanding were mainly at commercial banks and credit unions, and were centered in auto credit and revolving credit.

Commercial paper

Commercial paper outstanding fell \$800 million seasonally adjusted in July, the first decrease since October 1976. All of the nonbank-related components of the series declined in June. Nonfinancial paper increased only \$600 million in July, well below the average monthly increases of \$2.5 billion in the second quarter and the \$1.9 billion average rise in the first quarter. Dealers reported that the large

number of long-term financings by businesses in June and July contributed to this weakness. Over the two months, nonfinancial commercial paper issuers sold almost \$6-1/2 billion of long-term debt, a portion of which apparently was used to pay down outstanding commercial paper.

Deposit flows at nonbank thrift institutions

Data on deposit flows at savings and loan associations in the last 10 days of July, received too late to be incorporated into the monetary aggregates table included in this Supplement, indicate somewhat slower growth than had been estimated. The rate of expansion of total small time and savings deposits at all thrifts is now estimated to have been at about a 6-3/4 percent annual rate in July, 1 percentage point below the July figure in the table. Savings deposit growth remained quite strong, while small time deposits now appear to have declined slightly.
