## **Prefatory Note**

The attached document represents the most complete and accurate version available based on original copies culled from the files of the FOMC Secretariat at the Board of Governors of the Federal Reserve System. This electronic document was created through a comprehensive digitization process which included identifying the bestpreserved paper copies, scanning those copies,<sup>1</sup> and then making the scanned versions text-searchable.<sup>2</sup> Though a stringent quality assurance process was employed, some imperfections may remain.

Please note that this document may contain occasional gaps in the text. These gaps are the result of a redaction process that removed information obtained on a confidential basis. All redacted passages are exempt from disclosure under applicable provisions of the Freedom of Information Act.

<sup>&</sup>lt;sup>1</sup> In some cases, original copies needed to be photocopied before being scanned into electronic format. All scanned images were deskewed (to remove the effects of printer- and scanner-introduced tilting) and lightly cleaned (to remove dark spots caused by staple holes, hole punches, and other blemishes caused after initial printing).

<sup>&</sup>lt;sup>2</sup> A two-step process was used. An advanced optimal character recognition computer program (OCR) first created electronic text from the document image. Where the OCR results were inconclusive, staff checked and corrected the text as necessary. Please note that the numbers and text in charts and tables were not reliably recognized by the OCR process and were not checked or corrected by staff.

#### THE DOMESTIC NONFINANCIAL ECONOMY

### Housing starts and permits

Housing construction remained strong in April, with new starts at an annual rate of 1.9 million units for the second consecutive month. Newly issued permits for residential building fell 5 percent last month, but, at a 1.66 million unit rate, this indicator remained in the improved range seen in the first quarter. Activity was most robust once again in the South and West regions.

The advanced level of starts activity reflected continued strength in all types of units. Single-family starts in April were about unchanged at an advanced 1.16 million unit annual rate. Surprising strength in multifamily construction persisted into April. Multifamily starts last month were at a 745,000 annual rate--the third month in the past four in which such activity topped the 700,000 mark. For 1984 as a whole, multifamily starts averaged 665,000, the strongest pace in more than a decade.

	banks <sup>8</sup> warterly growth rates are computed on a qua	0.2	-1.4	-1.4	-1.7	-1.2	2.8	14.6

3. Overnight and continuing contract RPs issued to the nonbank public by commercial banks plus overnight Eurodollar deposits issued by branches of U.S. banks to U.S. nonbank customers, both net of amounts held by money market mutual funds. Excludes retail RPs, which are in the small time deposit component.

4. Growth rates are for savings deposits, seasonally adjusted, plus money market deposit accounts (MMDAs), not seasonally adjusted. Commercial bank savings deposits excluding MMDAs declined during March and April 1985 at rates of 10.9 and 8.0 percent respectively. At thrift institutions, savings deposits excluding MMDAs increased in March 1985 at a rate of 2.9 percent and declined during April at a rate of 1.4 percent.

5. The non-M2 component of M3 is seasonally adjusted as a whole.

Net of large-denomination time deposits held by money market mutual funds and thrift institutions.
 Consists of borrowings from other than commercial banks in the form of federal funds purchased, securities sold under agreements to repurchase, and other liabilities for borrowed money (including borrowings from the Federal Reserve and unaffiliated foreign banks, loan RPs and other minor items). Data are partially estimated.
 Consists of Treasury demand deposits at commercial banks and Treasury note balances.
