## Prefatory Note

The attached document represents the most complete and accurate version available based on original copies culled from the files of the FOMC Secretariat at the Board of Governors of the Federal Reserve System. This electronic document was created through a comprehensive digitization process which included identifying the bestpreserved paper copies, scanning those copies, ${ }^{1}$ and then making the scanned versions text-searchable. ${ }^{2}$ Though a stringent quality assurance process was employed, some imperfections may remain.

Please note that this document may contain occasional gaps in the text. These gaps are the result of a redaction process that removed information obtained on a confidential basis. All redacted passages are exempt from disclosure under applicable provisions of the Freedom of Information Act.

DOMESTIC NONFINANCIAL ECONOMY

## Producer Prices

The producer price index for finished goods rose 0.4 percent in October, boosted by a 1.4 percent jump in food prices. The food price increase reflected large price hikes for pork, dairy products, and fresh and dried vegetables. Finished energy prices rose 0.2 percent, as a 2-1/4 percent increase in gasoline prices was partially offset by a 2-1/2 percent decline in natural gas prices. Excluding food and energy, finished goods prices rose just 0.1 percent, held down by a 1.4 percent decline in prices of passenger cars. Excluding the effects of passenger cars, the PPI excluding food and energy rose 0.2 percent. The decline in auto prices comes on the heels of a 3.8 percent increase in September; this recent patter. reflects problems with seasonal adjustment at the end of the model year. Over the past twelve months, car prices have risen 1.6 percent.

Intermediate materials prices excluding food and energy rose only 0.1 percent in October and have been about unchanged since March. In October, prices continued to fall for a number of materials, including paper, steel mill products, and plastic resins and materials. However, prices rose sharply for plywood and softwood lumber.

## U.S. International Financial Transactions

Recently released data on U.S. international capital tidnsactions for September are shown in the "Summary of U.S. International Transactions Table. Private capital flows through banking and private securities transactions were broadly similar to those for August discussed in the Greenbook. Private foreign net purchases of Treasury obligations in September (line 3) were roughly half those recorded in August, a decline consistent with the pattern of Treasury offerings. Foreign official reserve assets in the United States (line 4) declined \$3-1/2 billion in September as the $G-10$ countries as a group made little change to their holdings in the United States, while other countries, particularly Taiwan, reduced their reserve positions in the United States.

[^1]
[^0]:    ${ }^{1}$ In some cases, original copies needed to be photocopied before being scanned into electronic format. All scanned images were deskewed (to remove the effects of printer- and scanner-introduced tilting) and lightly cleaned (to remove dark spots caused by staple holes, hole punches, and other blemishes caused after initial printing).
    ${ }^{2}$ A two-step process was used. An advanced optimal character recognition computer program (OCR) first created electronic text from the document image. Where the OCR results were inconclusive, staff checked and corrected the text as necessary. Please note that the numbers and text in charts and tables were not reliably recognized by the OCR process and were not checked or corrected by staff.

[^1]:    1. These dete have not been adjusted to exclude commissions on securities transactions and, therefore, do not match exactly the data on U.S. international tremsactions as published by the Department of Coumerce.
    2. Includes all U.S. bonds other than Ireatury obligations.
    3. Includes deposits in banks, coomercial paper, acceptances, borrowing under repurchase agreaments, and other securities.
    4. Seasonally adjusted.
    5. Includes U.S. sovernment assets other than official reserves, transactions by nonbanking concerns, and other banking and offi transactions not shown elsowhere. In addition, it includes amounts resulting from adjustments to the data made by Department of Cownore and revisions to the data in lines 1 through 5 since publication of the quarterly data in the ey of Current Business.
    -ess than $\$ 50$ mililion.
