Your comment: I'm watching my country slowly go into debt I fear for the future. My family has been part of America for hundreds of years going back a long time. I don't think my country will be able to pay my disability much longer. Because they are in debt. I too was in debt. I know what it's like. I have nothing worth anything to anyone except my art. If my country defaults social security is gone the country is gone but people keep spending as if we are addicted someone please stop it. I mean how much debt do they want us in o mighty banking masters. Because the America of old has become a country of gluttony and greed. We strayed from what is right. I know people need money, but at what

cost. If you love America you should cut off funding and please set up a reasonable payment plan to pay back the debt please. Because if you don't we lose what was once America of the people. The federal government will have to default the states will separate to salvage what they can and America will be fully divided and destroyed you wNt that legacy? I don't I want my government to be fiscally responsible and the federal reserves to be responsible with how much they loan if this is a power grab for the country it's probably not good karma. Let's all fight together to make America work for everyone. Please help. I know your important and I'm no one but if you knew me you would say he tells the truth if my government is not going to say it it's up to every citizen to help so this is hoelw I help please cut down on credit and set up a reasonable lower interest 100 years payments and please help us I fear for the worst. We need people to be honest ok America needs to go on a diet if we are going to survive it needs to start now please
