Instructions for the Preparation of

## **Annual Daylight Overdraft Capital Report for U.S. Branches and Agencies of Foreign Banks**

Reporting Form FR 2225

Effective October 2020

# Annual Daylight Overdraft Capital Report for U.S. Branches and Agencies of Foreign Banks

## FR 2225

### General Instructions

#### Who Should Report

The FR 2225 is required for foreign banking organizations (FBOs) that wish to, and are eligible to, establish a non-zero net debit cap for their U.S. branches and agencies under the Federal Reserve Policy on Payment System Risk (PSR policy).

If an FBO has more than one U.S. branch or agency, the office designated to handle daylight overdrafts for the bank in accordance with the PSR policy would report to its Administrative Reserve Bank<sup>1</sup> on behalf of the foreign bank family. For this purpose, the term “foreign bank family” is defined as all U.S. branches and agencies of the same foreign bank.

#### Use of the Report and Definitions

For the purpose of calculating an FBO’s net debit cap for the Federal Reserve’s PSR policy, an FBO’s Administrative Reserve Bank must first determine the FBO’s U.S. capital equivalency. U.S. capital equivalency is the amount that the Board of Governors of the Federal Reserve System has determined may be used by an FBO’s U.S. branches and agencies as the equivalent capital measure for U.S. chartered depository institutions. For FBOs that wish to establish a non-zero net debit cap for their U.S. branches and agencies, U.S. capital equivalency is a fraction of the capital base reported as Item 3.

#### When to Report

This report is due 90 days after the bank’s fiscal year-end in order to maintain its net debit cap.

---

1. The Administrative Reserve Bank is responsible for daylight overdraft monitoring and counseling.

In addition to the fiscal year-end filing, banks may complete the report at anytime (whether or not it coincides with the annual reporting period) if their bank’s capital figure has changed materially, or if they wish to change their reporting option. Otherwise, the capital figure most recently reported will continue to be used until 90 days after the end of the fiscal year for calculating the net debit cap for the foreign bank family.

#### Where to Report

The U.S. office designated to handle daylight overdraft matters for the foreign bank family should submit this report to its Administrative Reserve Bank responsible for daylight overdraft monitoring and counseling.

#### Does the FBO request confidential treatment for any portion of the report?

Once submitted, a reporter’s FR 2225 report becomes a Federal Reserve Board (Board) record and is available to the public upon request on an individual basis pursuant to the Freedom of Information Act (FOIA), 5 U.S.C. § 552. However, a reporting FBO may request confidential treatment for data items the FBO believes fall under an exemption under the FOIA, 5 U.S.C. § 552(b).<sup>2</sup>

A request for confidential treatment must be submitted in writing concurrently with the submission of the FR 2225 report. This written request for confidential treatment must identify the specific data for which con-

---

2. Under the FOIA, Board records generally must be publicly disclosed in response to a FOIA request, however, records containing certain categories of information may be exempt from disclosure in whole or in part under the FOIA. For example, one exemption under the FOIA protects trade secrets, and privileged or confidential commercial or financial information (5 U.S.C. § 552(b)(4)), which an institution both actually and customarily treats as confidential, and which the federal agency has assured the submitter will be treated as confidential.

---

## General Instructions

Confidential treatment is sought and must provide the legal justification for the confidentiality request, as provided in the Board's Rules Regarding Availability of Information (12 CFR part 261). In addition, label as "Confidential" each item for which confidential treatment is sought and submit this information under a separate cover page marked "Confidential."

The Federal Reserve will review each confidentiality request on a case-by-case basis to determine if confidential treatment is appropriate. The Federal Reserve may subsequently release information for which confidential treatment was granted, if (1) disclosure of such information is required by law (other than 5 U.S.C. § 552); (2) the request for confidential treatment (CTR) was made by the FBO pursuant to 5 U.S.C. § 552(b)(4) and more than 10 years have passed since the CTR; or (3) less than 10 years have passed since the CTR, but the Board believes that the information can-

not be withheld from disclosure under 5 U.S.C. § 552(b)(4), and the reporting FBO is provided with written notice of the Board's views and with an opportunity to object to the Board's disclosure of the information pursuant to 12 CFR 261.15 and 261.16.

### Foreign exchange conversion rate used in calculating Item 1.a. and Item 4.

For major currencies, the exchange rate to be used for this conversion is the rate quoted by the Federal Reserve Board of Governors, or some other consistent series of exchange rate quotations. (If deposits are issued in a currency basket, consistent series of exchange rate quotations either from the basket unit or for the corresponding individual exchange rates may be used.)

# Annual Daylight Overdraft Capital Report for U.S. Branches and Agencies of Foreign Banks

## FR 2225

### Item Instructions

#### Item 1.a. Amount of worldwide capital of the reporting bank (in U.S. dollars—based on the exchange rate as of the date of the financial statement)

Enter the U.S. dollar equivalent of the worldwide capital of the reporter's foreign bank. (If the reporter's foreign bank, in turn, is owned by another bank or nonbank, use only the reporting bank's capital.) A foreign bank that meets the criteria indicated in the "Use of the Report and Definitions" section may choose EITHER of the options listed below. (The first is smaller but may be easier to report.) For either option, the foreign bank family should be willing and able to document the value reported in Item 1.a. to U.S. bank examiners.

#### Item 1.b. Reporting option (One of the following two options *must* be chosen):

**Equity Only**—The amount of foreign bank tangible equity capital (or comparable figure for government-owned banks) as published in the bank's most recent annual, semi-annual, or quarterly reports (as appropriate) or, if the bank does not release such figures to the public, as submitted to the home-country supervisory authorities.

For this purpose, the term "tangible equity capital" includes common stock, preferred stock, surplus, undivided profits, contingency and other capital reserves (or the home-country version of these balances). However, it does NOT include any valuation reserves. All goodwill, other intangibles, and any deferred losses that are included in its total assets must be deducted. This item is equivalent to core capital under the Basel Capital Accord.

**OR**

**Total Qualifying Capital**—The amount qualifying for total capital (Tier I plus Tier II) under the Basel Capital Accord in the foreign bank's home country (or its equivalent as described in the section "Use of the Report and Definitions").

#### Item 2. Less: Adjustments to avoid double counting

Enter the total amount of capital included in Item 1.a. of this report that was used by any direct or indirect subsidiary of this bank to calculate its own net debit cap. The value should equal the foreign bank's carrying value of its investments in such subsidiaries. The amount entered in Item 2 relates to only majority-owned subsidiaries of this reporting bank that have their own U.S. offices that incur overdrafts. Types of subsidiaries covered by this adjustment include:

- (1) U.S. commercial or savings bank or savings association, including any Edge or Agreement Corporation majority owned by that U.S. subsidiary and consolidated in its financial statements;
- (2) Edge or Agreement Corporation owned directly by this reporting foreign bank (i.e. not owned through a subsidiary U.S. bank); and
- (3) Non-U.S. bank that has a U.S. branch or agency office or an Edge or Agreement Corporation subsidiary of its own.

The purpose of this adjustment is to avoid double counting of capital figures for banking organizations with more than one entity participating directly on Fedwire. Accordingly, the intent of this adjustment is to subtract *only* the amount of capital of such other participating entities that is included in Item 1.

#### Item 3. Equals: Daylight overdraft capital base for the U.S. branch and agency family

Subtract Item 2 from Item 1.a. and enter the amount on Item 3. This amount is the worldwide capital base of

---

## Item Instructions

the foreign bank that is used to calculate the net debit cap for the foreign bank family.

**Item 4. Amount of worldwide total assets of the reporting bank (in U.S. dollars—based on the exchange rate as of the date of the financial statement)**

Enter the worldwide total assets of the reporter's foreign bank, on either a consolidated or combined basis, as of the date of the financial statement from which the capital figure reported in Item 1 was derived. This figure should be consistent with the definition of world-

wide assets used in the instructions for the Annual Report of Foreign Banking Organizations (FR Y-7) Item 4, Section C. This figure must:

- (1) use either a consolidated or a combined basis;
- (2) include the total assets of all companies in which the foreign bank owns 50 percent or more of the voting shares; and
- (3) include the total assets of companies in which the foreign bank owns 25 percent or more of the voting shares if all such companies are included.
