

BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM  
Washington, D.C. 20551

INTERNATIONAL APPLICATIONS AND PRIOR NOTIFICATIONS  
UNDER SUBPARTS A AND C OF REGULATION K

Public reporting burden for this information collection is estimated to vary from 10 to 20 hours per response, with an average of 12 hours per response, including time to gather and maintain data in the required form and to review instructions and complete the information collection. Comments regarding this burden estimate or any other aspect of this information collection,

including suggestions for reducing the burden, may be sent to Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, and Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, D.C. 20503.

## General Information and Instructions

The following material has been prepared to assist in preparation of applications and prior notifications relating to international operations under the Board's Regulation K. Checklists are attached providing the types of information that will normally be required. Some of the items may not be applicable to a particular proposal. Applications and notifications that, in the judgment of the Reserve Bank, do not substantially contain the information specified in the checklists will not be accepted and may be returned to the applicant for resubmission.

Applications and notifications should be addressed to the Board of Governors of the Federal Reserve System in 10 copies and are to be submitted to the Federal Reserve Bank of the District in which the parent company is located or, if none, the District in which the applying organization is or will be located. Submissions may be in letter form, or by cover letter accompanied by a memorandum containing the required information. Prior consultations with the Reserve Bank, and, if necessary, the Board's staff, are suggested to resolve questions or to assure that applications and notifications for proposed Edge corporations or investments or branches with unusual characteristics are properly filed. Investments must be reported after the fact on the FR 2064, and branch openings, closings, and relocations must be reported after the fact on the FR 2058 in accordance with the instructions for those forms.

Applications and notifications will be made available to the public upon request. If an applicant is of the opinion that disclosure of

commercial or financial information that is not available to the public from any other source would likely result in substantial harm to the competitive position of an applicant or its affiliates, or that disclosure of information of a personal nature would result in a clearly unwarranted invasion of personal privacy, confidential treatment of such information may be requested. (A claim that disclosure would violate the law or policy of a foreign country is not, in and of itself, sufficient reason to exempt information from disclosure. If it can be demonstrated that disclosure would meet the "substantial competitive harm" test, however, then the information may be exempted.) A request for confidential treatment must be submitted in writing concurrently with the submission of the application or notification and must discuss in detail the justification for confidential treatment. Justification must be provided for each specific item of which confidential treatment is requested. Applicant's reasons for requesting confidentiality should demonstrate the harm that would result from public release of the information. A statement simply indicating that the information would result in competitive harm or that it is personal in nature is not sufficient. Information for which confidential treatment is requested should be (1) specifically identified in the public portion of the application (by reference to the confidential section), (2) separately bound, and (3) labeled CONFIDENTIAL. Adherence to these procedures is an essential prerequisite to processing of applications and notifications. Applicants should also follow this procedure with regard to the filing of any supplemental information.

  - c. If projections indicate that at the end of the third year of operations of the proposed branch, the direct and indirect exposure, as calculated above, will increase by more than 25 percent from levels at the time of the investment and this amount is greater than 25 percent of consolidated capital, show the projected consolidated exposure for that country.
